The Audi A4 is not different in this regard and uses vacuum to assist in the EGR (exhaust gas recirculation) system as well as the intake system. The EGR is part of the efforts used to recirculate unburnt gases from the motor back into the combustion chamber to be burnt and result in a cleaner running engine. Vacuum is also used to control the amount of air entering the combustion chamber ...

Fitting a 315cc injector will take you to around 245bhp; Bosch 550cc injectors allow power approaching 350bhp; Bosch 630cc injectors will see you hit around 400bhp. As a rule of thumb add 20% to the flow rate when buying an injector, this takes into account injector deterioration and affords a bit of spare capacity should the engine need more fuel.
