This allows users to turn the heat up or down on the stove using a dial which either increases or decreases a delay timer which controls another AC line voltage signal to the feed motor. Potentiometers can have more than one output signal thus allowing one dial control to affect multiple components. For example; the dial-a-fire control on the Enviro EF4 and EF5 (Solus and Evolution), use a ...

The stove body should be replaceable in the support frame of the stove to reduce maintenance costs. A cheaper and more or less satisfactory stove body can be made by ramming a damp plastic mixture consisting of 60% clay, 20% sand and 20% charcoal fines approximately, into a wooden mould and allowing it to dry. Though not as permanent as burned earthenware, it is cheap.

If the fire is an indoor stove or fireplace (not a self-placed campfire) the fire will heat up the air temperature of the entire room, so you can walk to the end of the room (far past where a normal campfire would stop warming you) and craft for hours with no fear of freezing. Open-faced caves are warmer at the back than at the front.
