Using Access 2010 I cannot step into the code I have written for a form in Access. Shouldn't I be able to step through it using the F8 key? Does this indicate a damaged install of Access?

[Microsoft Access 2013 Step by Step: 9780735669086 ...](#)

I can indeed step through the code when I set a breakpoint. But has this always been required? If I create a Code Module rather than a form code behind, the F8 and F5 keys work as expected; I step thru each line of code or execute the entire block. However, in the code behind a form they do not: the F5 invokes the Macro dialog box and F8 just beeps at me. I am using Access 2007 with an accdb ...
