Biochemistry or biological chemistry, is the study of chemical processes within and relating to living organisms. A sub-discipline of both chemistry and biology, biochemistry may be divided into three fields: structural biology, enzymology and metabolism. Over the last decades of the 20th century, biochemistry has become successful at explaining living processes through these three disciplines.

Sodium chlorate appears as an odorless pale yellow to white crystalline solid. It is appreciably soluble in water and heavier, so may be expected to sink and dissolve at a rapid rate. Although it is not itself flammable, the solid product and even 30% solutions in water are powerful oxidizing agents. Contact with wood, organic matter, ammonium salts, sulfur, sulfuric acid, various metals, and ...

Preface. The first edition of this volume has been commended and criticized by the public. It was admitted to be a valuable compendium of the curiosities of literature generally, and especially of that pertaining to magic, but that it was at the same time calculated to foster superstition, and thereby promote evil – a repetition of the charge made against the honorable Horst, the publisher ...
