[Technical Analysis Explained Forex Trading](#)

In finance, technical analysis is an analysis methodology for forecasting the direction of prices through the study of past market data, primarily price and volume. Behavioral economics and quantitative analysis use many of the same tools of technical analysis, which, being an aspect of active management, stands in contradiction to much of modern portfolio theory.

[Forex for Beginners: An Introduction to Forex Trading](#)

Scalping is a method of trading based on real-time technical analysis. When it comes to Forex trading, scalping generally refers to making a large number of trades that each produce small profits. Rather than holding a position for several hours, days or weeks, the main goal of scalping is to make a profit in as little as minutes, gaining a few pips at a time. The FX market is the most liquid ...
